Education

Lovely Professional University

Aug 2022 – May 2026

B.Tech in Computer Science and Engineering

CGPA: 7.5/10.0

- Relevant Coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Data Structures & Algorithms, DBMS
- Academic Excellence: Ranked among top 11% in CSE department

Work Experience

Advanced Software Engineering Virtual Internship

Oct 2025

Walmart USA – Forage Certificate

Remote

- Optimized shipping algorithms through custom heap data structure implementation in Java, reducing query latency by 30%
- Designed relational database schemas for warehouse operations, enhancing query performance by 20%
- Developed UML-based modular system architecture improving code maintainability and reducing production defects by 15%

Projects

Self-Healing DevOps Agent | Python, OpenAI GPT-4, Streamlit, GitHub Actions, REST APIs | 🌐

June 2025

- Engineered production-grade AI automation platform autonomously detecting CI/CD failures and generating intelligent code fixes via GPT-4 integration, boosting deployment reliability by 85%
- Developed scalable microservices architecture with automated pull request workflows and RESTful endpoints for continuous integration
- Implemented real-time observability dashboards with predictive analytics for proactive error detection across distributed systems

Vision Voice – AI Accessibility Assistant | Flask, Azure Cognitive Services, Tesseract OCR, GTTS | 🌐

May 2025

- Built cloud-native accessibility solution with multi-language text-to-speech capabilities serving visually impaired users, processing 2K+ documents with 40% faster response times
- Architected RESTful APIs leveraging Azure OCR and speech synthesis services for seamless cross-platform integration
- Deployed production application on Azure App Service with authentication protocols, increasing user engagement by 80%

Smart Surveillance System | React, TypeScript, Firebase, TailwindCSS, Docker | 🌐

April 2025

- Developed intelligent monitoring platform with real-time facial recognition and sentiment analysis using deep learning, enhancing security operations efficiency by 60%
- Built responsive SPA using React-TypeScript stack with synchronized multi-camera feeds and instant alert notifications
- Integrated Firebase authentication with Firestore NoSQL database for secure event logging and metadata management, improving data retrieval speed by 50%

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C++, SQL

Frameworks & Libraries: React, TensorFlow, PyTorch, LangChain, RAG, Flask, Keras, NLTK

AI/ML Platforms: OpenAI API (GPT-4), Azure Cognitive Services, Hugging Face Transformers

Cloud & DevOps: AWS (EC2, Lambda, S3), Google Cloud Platform, Azure, Docker, Kubernetes, GitHub Actions, CI/CD

Backend & APIs: RESTful Services, Microservices, Flask, Node.js, Firebase, API Gateway

Development Tools: Git, Virtual Environments (pip, uv), Streamlit, Tesseract OCR, Vite, TailwindCSS

Achievements

Google Nibbler's Project – Awarded **15,000 prize** for AI workflow automation excellence

Flipkart Grid 6.0 Robotics Challenge – **National Semi-Finalist** competing against thousands nationwide

Google Girls Hackathon 2025 – Advanced to **Round 2** with innovative "Tax Assistant AI" solution

Smart India Hackathon – Selected participant delivering innovative tech solutions for government challenges

Amazon ML Summer School – Accepted into competitive program focusing on advanced machine learning algorithms

Competitive Programming – Solved **200+ problems** across LeetCode, GeeksforGeeks, and HackerRank platforms

Academic Excellence – Ranked **top 11%** in Computer Science Engineering cohort at LPU
